

Comprehensive Training Services

GCP including R2

For Operations Certify your operational team on GCP while learning about the new elements of R2 and important areas targeted by regulatory authorities. Assessment-based **Certification**. Offered through **eLearning**.

For Sites Fulfill GCP site certification requirements while learning about R2 changes impacting subjects, key trial documents, and the processes supporting enrollment and monitoring. Assessment-based **Certification**. Offered through **eLearning**.

R2 Impact for QA

Your Quality Assurance associates will be prepared on how GCP and its incorporation of R2 impact study audits and its focus areas, assessing vendor compliance, and site selection. Offered through **Webinar**.

R2 Awareness

The purpose of this course is to equip Sponsors and CROs with an appreciation of the changes in R2 and the rationale behind them. It will also provide the knowledge necessary for successful design, conduct and reporting of a clinical trial. Assessment-based **Certification**. Offered through **eLearning** and **Webinar**.

Risk Assessment

This training is designed to take the audience from a high level regulatory and psychological perspective on risk management, through a practical framework for performing risk assessment and management, followed by specific case study examples. Offered by **Workshop** and **Webinar**.

All eLearning courses are SCORM 1.2 and AICC compliant.

To sign up for a course, email info@tritrials.com.
