

5 Steps to Effective Quality Management

Web based, instructor led awareness and certification – to ensure your staff are ware of the changes in ICH E6 (R2), why they have been implemented and what they are going to mean to your company. More than 35 companies have already received this training.

Gap analysis of your current SOPs, policies and job descriptions against the new R2 guidelines to identify where your company will need to make updates and or additions in order to be compliant.

Update of your QMS based on the gap analysis. We have a set of pre-defined assets available, which can be tailored to your needs in order to, accelerate and reduce the cost of achieving compliance.

Definition of what compliance means to your business, how you communicate your capabilities to internal customers and/or sponsors, and the approach you will take to Quality Management and Central / risk-based monitoring.

The implementation of the OPRA system to deliver quality management and RBM to your customers on a per study basis – all costs passed through to sponsor.

Engage with one of our specialists to find out how we can help your firm become ICH E6 (R2) compliant.
